Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Arguments

Applicant's arguments filed July 8, 2008 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hooper.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 and 12-16 are rejected under 35 U.S.C. 102(c) as being anticipated by Hooper (US 7,181,742)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

1. Regarding claims 1 and 12, Hooper discloses a method comprising buffering packet header and payload data corresponding to several inbound TCP packets received at a destination machine in an inbound buffer (Fig. 5, item 158; col. 2, line 18 and 30-34) and performing TCP

input processing of the packet header and payload data that is buffered via a multi-threaded hardware engine (col. 2, lines 4-8) where the threads are concurrently executed by the engine (col. 2, lines 25-26).

2. Regarding claims 2 and 13, the thread processing is via a scheduler (col. 2, lines 3-5).
3. Regarding claims 3 and 14, the threads' states are handled in cycles (col. 1, line 60 through col. 2, line 3).
4. Regarding claims 4 and 15, the engine comprises a TOE (col. 6, line 2).
5. Regarding claims 5 and 16, the payload data is transferred to host memory for TCP processing (col. 2, lines 30-45; col. 5, line 64 through col. 6, line 2).

Allowable Subject Matter

Claims 6-11 and 17-21 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 22-30 are allowed.
